- Provided information to spread awareness and assistance to child abuse by giving out information and communicating with victims of abuse
- Took care of the children this included cleaning, interacting and controlling the children that were physically and mentally abused.

## **CLINICAL WORK EXPERIENCE**

### **Miami Jewish Home and Hospital for Aged**

May. 2014

- Location where I started learning about hands on nursing for Fundamentals of Nursing
- Learned how to clean patients, make beds, basics of nursing.
- Followed a registered nurse and learned the basics of nursing such as receiving report, assessment and doing nurse tech responsibilities as well.
- Learned how to read an EKG strip, apply telemetry leads to patients, and watch electronic monitors of all patients on the floor. Took vital signs of patients.

## **Aventura Hospital and Medical Center**

Aug. 2015

- Location where I performed my nursing student clinical obligations for Medical Surgical I.
- Worked with another registered RN in taking care of 6-7 patients on a telemetry unit by administration of prescribed drugs, starting IV's, learning communication therapeutic techniques, applying critical thinking when making a patient care plan, help with documentation for the nurse, and teaching patients on specific drugs and nursing actions conducted.
- Also got clinical experience in a GI unit, dialysis unit, and ER and learned how they are run and also the duties of the nurse as well as how to assess and assist physicians on the floor as a nurse.

## **Mount Sinai Medical Center**

Jan. 2016

- OB rotations, I learned how to do perinatal assessments on the mother and newborn assessments, care for the mother and newborn, as well as observe for the first time a vaginal birth as well as a caesarean delivery in the operating room.

## **Jackson Behavioral Health Hospital**

May. 2016

- Location where I performed my clinical rotations for Psychiatric Nursing.
- Learned how to communicate therapeutically to psychiatric patients, assess psychiatric patients, learn about psychiatric medications, legalities and documentation, and conduct an interpersonal process recording.

## **Nicklaus Children's Hospital**

Jun. 2016

- Location where I performed my clinical rotations for Pediatrics Nursing - Worked on an oncology floor.
- I learned how to assess the needs of parents and children during their hospitalization, successfully performed an assessment of a child, use the principles of growth and development by Erickson to differentiate normal and abnormal responses of each group of my patients, learned about the different dosages for kids compared to adults, and how to therapeutically communicate to kids according to their growth and development as well as respond therapeutically to concerns of the families and friends of the patient.

## **Various locations for Community Health Nursing**

May. 2016

- learned to identify the learning needs of the community as well as identify the values held by various cultures.
- I performed various community services in locations around Miami. I worked in a health fair in Miami Dade College medical campus where I performed hands on blood glucose checks and helped educate patients on diabetes based on my nursing knowledge. I volunteered my services for another health fair in Miami Gardens where I taught the community about the importance of nutrition and regular visitation to a physician. I volunteered for the Women's Breast & Heart Initiative by going door to door educating the importance of Self-Breast examinations and the promoting the initiative's free mammogram service.

## **Kendall Regional Medical Center Telemetry Unit**

Jun. 2016

- Further continued my Medical Surgical Nursing rotations. Learned how to receive bedside report from previous shift nurses, how to prioritize patients according to their status and needs, able to run pumps and lines into patients, administer medications of prior knowledge and educate the patients about these medications, assess head to toe of patients on the floor, learned how to read an EKG strip and also how to discharge a patient. Helped take care of 1-2 patients and also helped nurse with standard load of patients.

### **Jackson Memorial Hospital Cardiac Care Unit**

- Did my Nursing leadership rotations at this location.
- Able to use my medical surgical knowledge and hands on techniques to take care of critically ill patients in an intensive care unit.

### **AWARDS/ HONORS**

- 2009 scholastic award silver metal for Painting, FIU Honors College art competition 2010 -2012 1st place awards
- Skills Know fundamentals of design primarily in architecture.
- Professional Painter with multiple art exhibitions in Art Basel, Cuba Nostalgia, and events with the Cuban Human Rights Foundation
- Fine arts Assistant to renowned painter Leonor Anthony of Simon's gallery 1/2014 to 8/2014
- Bilingual: English and Spanish.
- Active leader volunteer at The Women's Breast & Heart Initiative
- Flexible and willing to meet the needs of the organization regularly.
